FOREWORD

This publication contains data on wage rates and hours of labour in Nova Scotia Industry as of October, 1967.

The report is prepared from information gathered by the Canada Department of Labour for their annual survey entitled Wage Rates, Salaries and Hours of Labour. The Economics and Research Division of the Nova Scotia Department of Labour has co-operated with the Canada Department in the conduct of this survey. Our Division has translated this computerized information into detailed tabular form on industrial and regional bases.

These statistics are compiled for industry, province, county, and the six major urban areas. In all, there have been 36 industries, 15 counties, and 6 urban areas surveyed.

We wish to express our appreciation to the Nova Scotia employers whose participation in the survey has made possible the preparation of this report.

This survey has been compiled by the staff of the Economics and Research Division under the supervision of Mrs. Lois Barlow.

C. JEAN DOBSON
DIRECTOR

Economics and Research Division

GUIDE TO THE CONTENTS OF THE REPORT

This report presents information on wage rates and salaries by occupation and on hours of work in industry in Nova Scotia. The information covers the last normal pay period prior to October 1, 1967.

TECHNICAL NOTES

The Technical Notes outline the scope of the survey and describe the methods used in compiling the information included in the report. They also explain the nature and context of the tabular material presented, the terms used in the report and the criteria for publication.

PART 1: HOURS OF WORK

Information on standard hours of work is included for the five major industries as well as thirteen sub-industries. The average standard hours per week are shown for each industry under the headings, Office and Non-Office. Non-Office includes maintenance trades, service occupations, and specific industry occupations.

PART 2: INDUSTRY WAGE AND SALARY RATES

This section is composed of 36 separate industry tables of occupational wage rates. These industries come under five general headings: Manufacturing; Transportation, Communication, and Other Utilities; Trade; Service; and Public Administration. Each industry table presents information for a number of occupations characteristic of the industry being surveyed, where criteria has been met.

PART 3: PROVINCIAL WAGE AND SALARY RATES

Certain office and non-office occupations were studied on a provincial basis. Included are 45 office occupations and 22 non-office occupations, for a total of 67. In these charts an average salary or wage rate is given.

PART 4: COUNTY WAGE AND SALARY RATES

Fifteen of the eighteen counties were studied, the exceptions being Guysborough, Richmond and Victoria, for which none of the given information satisfied the criteria for publication. The tables include all office occupations, maintenance trades, service occupations and specific industry occupations in each county where criteria has been met. This year the specific industry occupations have been classified by major industries. For each occupation, the average and predominant range are included.

PART 5: URBAN AREA WAGE AND SALARY RATES

In this report only the six major urban areas of Nova Scotia were studied. As in the previous report, each urban area includes not only the city or town but also the entire surrounding area. Please see Appendix B for more details as to the delimitation of each area.

APPENDIX

This final section of the report defines certain occupational terms which the reader may find useful in comparing salary rates. There is also a map showing the various urban centers as well as a list giving the delimitation of the areas covered.

TECHNICAL NOTES

The complete survey of Wage Rates and Hours of Labour covers over 1,000 establishments in Nova Scotia. Included are all reporting establishments having 20 or more employees in the industries and urban areas surveyed.

The Federal Government conducts the survey by mail and a reporting form-questionnaire containing a short description of each occupation to be surveyed is sent to the employers. Occupational descriptions are provided to help employers identify the specific jobs for which wage information is requested. The survey questionnaire is broken into four parts:

1. General Questionnaire: Provides information on number of employees and hours of work, etc.

2. Office Occupations: Includes workers engaged in clerical, accounting and secretarial activities. Office employees are typically paid on a salary basis.

3. Maintenance Trades, Service Occupations and General Labourers: These are engaged in the provision of maintenance and auxiliary services closely connected with the production process.

4. Specific Industry Occupations: Includes those occupations particularly characteristic of the industry being surveyed.

NATURE AND CONTENT OF THE TABLES:

The wage information contained in this report is presented in two types of table. The first is an industrial breakdown on a provincial basis. The industry tables show the average and predominant range for each occupation. The wage information applies to office occupations, maintenance trades, service occupations and specific industry occupations.

The second part of this report is done on a regional basis which includes county and urban area breakdowns. In this section, information is presented by occupational classification. This year, for the first time, the specific industry occupations have been subdivided by major industries. In both these areas, returns from reporting establishments having 20 or more employees have been used to compile the information.

EXPLANATION OF TERMS

The term "average" as used in the report is the weighted average of straight time rates paid on a time basis in an occupation. To obtain these averages, the wage rates or earnings in an occupation are multiplied (weighted) by the number of employees receiving each rate, the total product being then divided by the total number of employees in the occupation used in the calculation of the average.

The "predominant range" of rates and earnings includes the middle 80 percent of the numbers of all employees reported in an occupation. In other words, ten percent of the workers received the highest figure shown in the range or more, and ten percent receive the lowest figure or less. No ranges are shown where the rates for an occupation apply to fewer than ten employees.

"Standard hours per week" refer to the number of hours per week normally scheduled for office and non-office employees in an establishment and during which straight time or regular wage rates are paid. Averages of the standard hours are obtained by multiplying the number of standard hours by the number of workers in each establishment and dividing by the total number of workers.

CRITERIA FOR PUBLICATION

Generally, for an average to be published, the rates which have been averaged must apply to at least five employees in the occupation in three establishments, or to ten or more employees in two establishments, provided that 80 percent or more of the total number of employees is not reported by one of the two establishments.

These criteria are applied for two reasons: to avoid revealing the rates paid by any one establishment, and to ensure a reasonable degree of representativeness of the data.

1967 REPORT

This is the third annual survey published by the Nova Scotia Department of Labour. In this report the industries have been classified from the 1960 Standard Industrial Classification of the Dominion Bureau of Statistics. (Complete details on this classification appear in the Standard Industrial Classification Manual, D.B.S. Publication 12-501.)

PART 1 - HOURS OF WORK

INDUSTRY	NUMBER OF ESTABLISHMENTS	EMPLOYEES		HOURS

APPENDIX A

Salary rates for salespersons, both male and female, were reported according to the following definitions:

SALESPERSON - CLASS A

Requires little knowledge regarding the merchandise sold. Often works behind a counter, selling one or a variety of inexpensive commodities such as notions, candy, drug sundries, tobacco products, magazines, greeting cards, etc.

SALESPERSON - CLASS B

Requires enough knowledge of products to assist customers in making a selection. May sell various types of merchandise or specialize in a particular type of commodity such as wearing apparel, bedding, small electrical appliances, china, costume jewellery, general hardware, etc.

SALESPERSON - CLASS C

Requires detailed knowledge of products and considerable skill in salesmanship. Is often on salary and commission and may be required to follow-up prospective sales by calling on customer at his home. Products sold tend to be higher priced, such as furniture, refrigerators, television sets, power tools, air conditioners, jewellery, etc.

APPENDIX B

The following are the delimitations of the six major "Urban Employment Areas" for Nova Scotia as shown on the map on the following page.

Amherst - Area bounded by a line beginning at Nappan on the Chignecto Canal connecting with Hastings northeast of Nappan, then bending back to the Nova Scotia-New Brunswick boundary in the direction of Sackville. Area includes all above-named Nova Scotia centers.

Halifax - Cities of Halifax and Dartmouth; Armdale and Fairview Area, Bedford and Waverley Area, Cole Harbour and Eastern Passage Area, Herring Cove and Spryfield Area, North Dartmouth Area, Rockingham Area.

New Glasgow - Area bounded by a line drawn from Logan Point to the town of Pictou, south to the villages of Alma, Westville and Eureka, north to Stellarton, New Glasgow, Trenton, and ending in Pictou Harbour. Area includes all above-named centers.

Sydney - Area bounded by a line drawn from Point Aconi to the Little Bras d'Or River along St. Andrew Channel to the village of Barachois. From here east to the village of Gibbon ending at Cape Perce. Area includes all above-named centers.

Truro - Area bounded by a line drawn from the village of Clifton, north to the village of Belmont, east to the village of Riverdale, southwest to the village of Brookfield and back to Clifton. Area includes all above-named villages.

Yarmouth - Area bounded by a line from Sandford on Highway 1 to Ohio on Highway 10 to Arcadia on Highway 3 and ending at Chebogue Point. Area includes all above-named centers.
